Staff Meeting Notes

MEAP scores were reviewed to find STRANDS that we need to focus on for school improvement. Science and Social Studies will chose an article that pertains to what is being taught. ELA teachers will use the article as writing or reading activity that week. Science and Social Studies need to coordinate with ELA on when this will happen. Science and Social Studies will provide the article twice a month and will give a copy to Mrs. Swoverland.

EXPLORE Test.

Staff will be taking a small part of the Explore test and will receive a reflective worksheet. You will complete this work sheet with your PLC groups and dissect the results from last year to gain a better understanding of what the test is worth. Becky will present a short video regarding the test and how teachers they can better use the results for their classrooms.

After, we will be tackling NWEA. Collette and Becky will show staff how to use the results in the classroom. This will take place in the media center with access to the computers. Teachers will have access to all students.

Becky will be in the classrooms on Monday, February 13, to discuss the Explore test with students.
