Out of the darkness, out of the night

Out of the shadows, you gave us light

You are my everything, my black, my white

And more than anything, you make it right!

Shine! Shine! Shine everyone!

Shine like the stars and the moon and the sun

You brought the daylight and turned out the night

You are the light of my world

In you a tiny spark, burning so bright

Lit up a world of dark, giving us sight

When I feel loneliness, when I feel fright

You fill the emptiness with your pure light

Shine! Shine! Shine everyone!

Shine like the stars and the moon and the sun

You brought the daylight and turned out the night

You are the light!

You make it right!

You are the light of my world!
