

(SUN)

See how the sun shines so brightly

See how it lights up the sky

Touching the world ever lightly

From where it sets way on high

Never a moon misbegotten

Each loves a warm afternoon

No one is ever forgotten

Each night you're replaced by the moon

Each night you're replaced by the moon

(MOON)

Moon Moon oh beautiful moon

Lights the sky so brightly

Oh moon moon oh beautiful moon

You shine so brightly

Just when the day is through your work
has begun

Each night we count on you to spell the
sun to spell the sun
